## A HUB FOR THE ENGAGED LIBERAL ARTS

- We are home to the state-of-the-art **Science & Engineering Hall**, an innovative teaching and research space for cross-disciplinary collaboration in chemistry, biology, physics, human paleobiology, engineering and public health.
- Our Corcoran School of the Arts & Design is **a hub for the arts** on campus and beyond. The school was named one of the 5 best art schools in the Southeast by *Art & Object*.
- Our nationally-ranked **Trachtenberg School of Public Policy & Public Administration** is one of only two U.S. schools to have its public policy and public administration graduate programs accredited by the National Association of Schools of Public Affairs and Administration.
- Columbian College faculty receive **multi-million dollar grants** from the National Science Foundation, National Institutes of Health and other renowned research centers to uncover age-old mysteries and seek solutions to 21st century challenges.
- We are **pioneers in offering academic programs** in Art Therapy, Political Communication, and Women's, Gender & Sexuality Studies.
- Our **School of Media & Public Affairs** hosts public platforms featuring prominent politicians and journalists who engage students on issues impacting the world.
- We use D.C. as a classroom like no other academic institution, hosting classes at such venerable sites as the U.S. Capitol and George Washington's Mount Vernon Estate. Plus, through a variety of partnerships, students have access to **research opportunities with federal agencies** and multilateral groups, including NASA and the World Bank.
- We boast a **century-long research collaboration with the Smithsonian Institution**, and our expertise in systematics, evolution of gait, and primate brain and dental morphology led to the creation of the Smithsonian's acclaimed **Hall of Origins exhibit**.
- Our **Eleanor Roosevelt Papers Project** – which works to publish digital and print editions of Eleanor Roosevelt's massive collection of political papers – is part of UNESCO's Memory of the World registry.

# MAKING A DIFFERENCE *through the Engaged Liberal Arts*

## Arts & the Humanities

Creative and humanistic scholarship enlighten our understanding of how we form, articulate and debate issues of religious, philosophical and cultural importance. From performances and exhibitions to language and literature, our students are challenged to think critically as they engage and interpret the world around us.

## Science & Quantitative Analysis

In the classroom and lab, our biologists, physicists, chemists and mathematicians are seeking actionable solutions to today's most pressing challenges. Faculty engage students in every step of the discovery process to mitigate climate change, treat disease, meet global energy needs, address cybersecurity and more.

## Social Science

Studying how we have evolved, the way we interact, live and govern and how we move forward as a society all reflect the essence of what makes up the social sciences. The knowledge we create through such disciplines as policy, psychology, communication and anthropology sheds new light on our past while helping us navigate the path ahead.
